## Artist Statement

---

I am an international student and have been studying abroad for more than a year. The environment is still strange and new to me. Different people, different language, different culture.

When I get to go back home, the moment I get off the airplane, I can feel the warmth of my home country, Taiwan.

I missed the passionate air and old-fashion surroundings. In my art, I record elements of the land I was born and raised. In this way, I hope I am still able to feel the warmth of my culture when I have to leave the country again.
